

My name is Ola and I am a mother who since 2017 has been looking for ways to treat her son with a rare disease (ZTTK syndrome).

I graduated from the Academy of Physical Education in Wrocław, then I was a manager of the Career Office and later an EU funds specialist. Most recently I got certified in the field of sensory integration (certified therapist).

Currently, I'm a full-time mom and a happy wife who is looking for health. You can meet me at mamaszukazdrowia.pl.

I believe that every day we wake up in a new, technologically better world, which lets you take a step that will be a milestone in the treatment and improvement of my child.

Nothing is impossible - you just need to find the way!
